About Rice

Rice is the staple food for more than half of the world's population.

Growing Conditions

Soil Type:

Clay or clay loam soil with good water retention

Climate:

Hot and humid climate with temperatures 20-35°C

Water Requirement:

High - requires standing water (1200-1500mm)

Sowing Time:

June-July (Kharif season)

Harvest Time:

3-4 months after transplanting

Farming Tips & Best Practices

1. Prepare nursery beds 3-4 weeks before transplanting
2. Transplant 25-30 day old seedlings
3. Maintain 5-7cm water level in field
4. Apply fertilizers: 120:60:40 NPK kg/hectare
5. Control weeds regularly, especially in first 40 days
6. Watch for stem borers, leaf folders, and blast disease
7. Drain field 10-15 days before harvest
