About Wheat

Wheat is a cereal grain that is a staple food worldwide.

Growing Conditions

Soil Type:

Well-drained loamy soil with pH 6.0-7.5

Climate:

Cool, moist weather during growth; warm, dry weather during harvest

Water Requirement:

Moderate - 450-650mm during growing season

Sowing Time:

October-November (Rabi season)

Harvest Time:

4-5 months after sowing

Farming Tips & Best Practices

1. Prepare field thoroughly with 2-3 ploughings
2. Use certified seeds (100-125 kg/hectare)
3. Apply NPK fertilizers: 120:60:40 kg/hectare
4. Irrigate 4-6 times during crop period
5. Control weeds within 30-40 days of sowing
6. Watch for rust, aphids, and termites
7. Harvest when grain moisture is 20-25%
